Subject: Action Plan 2018-2020 Submission

If this government is genuinely committed to open government that is solely for the benefit of the citizens of Australia then it will have no hesitation in ensuring that the next Open Government National Action Plan contains a Commitment for a Federal Independent Commission Against Corruption (ICAC).

This is the only way the government can guarantee it is, in actuality, a transparent bureaucracy acting only for the betterment and enrichment of all and is actively preventing corruption, cronyism and the misuse of entitlements by those entrusted, by voters, to conduct themselves honestly, and in strict accordance with the Ministerial and Parliamentary Guidelines, in every activity they undertake on their behalf.
